

PUSH

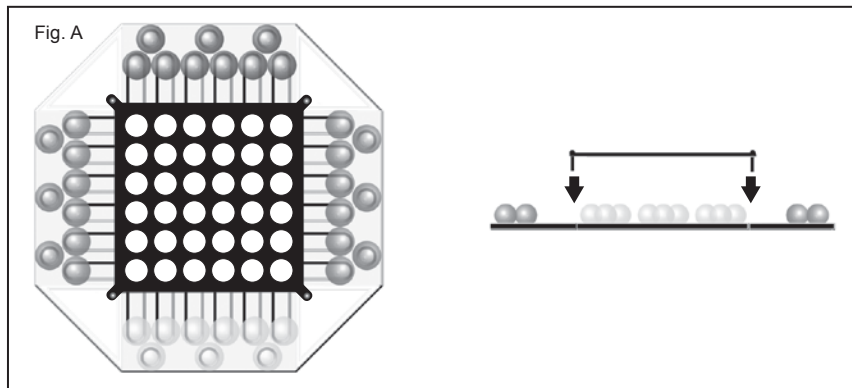

THE STRATEGY GAME

4

INSTRUCTIONS:

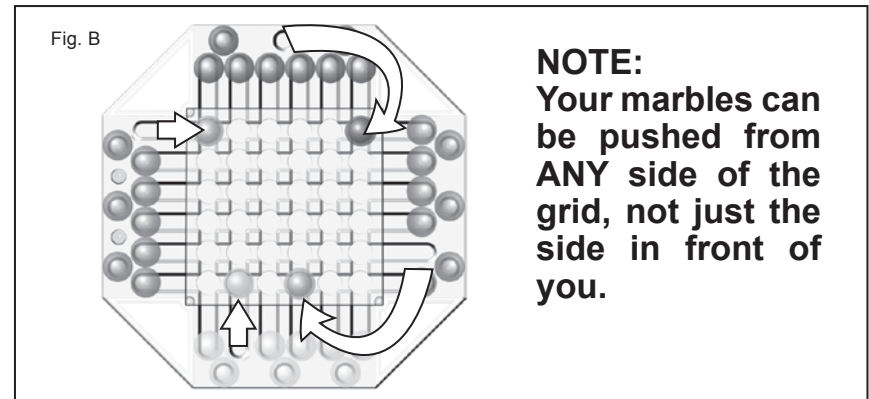

OBJECT: To insert your colored marbles into the grid under the rack, moving one space at a time and to be the first player to get 4 of your colored marbles in a row either vertically or horizontally.

SET UP: Place the game board in the center of the players and give each player all 9 of their colored marbles. Place the 4 legs of the center rack into the 4 holes on the game board so that the rack is sitting above the center grid of the game board. (Fig. A)

TO PLAY: The first player pushes a marble into the grid under the rack (ONE SPACE). The marble can be pushed into the grid from **ANY** side of the grid, not just the side in front of the player. (Fig. B) The next player then pushes one of his marbles onto the grid under the rack. Once again, the marble can be pushed in from **ANY** side. Play continues with each of the players taking turns placing marbles into the grid trying to be the first player to make 4 in a row either vertically or horizontally. If all the marbles are used without a winner it is a draw. Play again to determine a winner!

STRATEGY: You can put your marble behind another players marble and "PUSH" one of their marbles out of the grid. Even if a row is full you can still "PUSH" one of your opponents marbles out.

NOTE:
Your marbles can be pushed from **ANY** side of the grid, not just the side in front of you.

TO WIN: The first player to get 4 of their marbles in a row either vertically or horizontally wins the game.

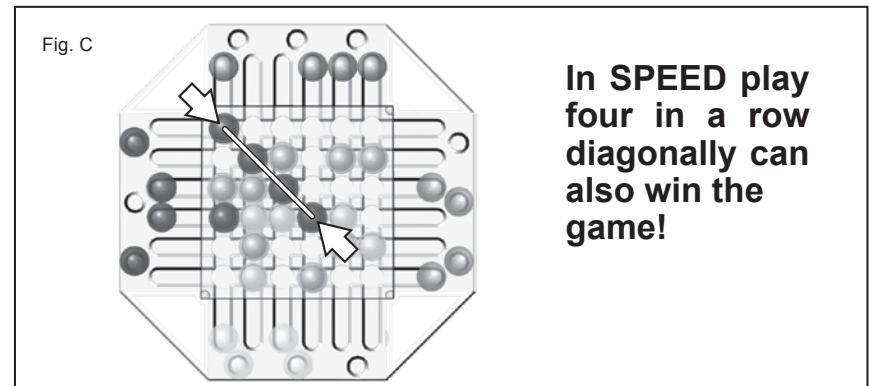

SPEED PLAY: The first player to get 4 of their marbles in a row either vertically, horizontally **OR DIAGONALLY** wins the game. (Fig. C)

2 PLAYER: Each player picks a color and alternates moves.

2 PLAYER COMBO: Each player picks two colors but must alternate moves.

4 PLAYER: Each player picks a color and alternates moves.

4 PLAYER TEAM: Each team picks two colors but must alternate moves.

In **SPEED** play four in a row diagonally can also win the game!
